

TimeSolv: A Superb 2022

Thank you to our customers and employees for turning 2022 into another blockbuster year for [TimeSolv](#) with a 30% + Y-O-Y growth.

Earlier today, I told our team that we are billing doctors, and we should feel proud to have the opportunity to solve problems faced by our firms.

TimeSolv's priority is to be a trusted advisor to our firms. Trust can only be earned by delivering what we promised, and we again achieved that trust this year.

In addition to delivering many new features, TimeSolv has provided an end-to-end automated [zero AR](#) process. It enables customers to process batch invoices and automate the communication needed and securely obtain [payment](#) methods for batch payments.

TimeSolv has been adding dashboards using Logi Analytics to ensure that customers view their data graphically. Moreover, we are developing advanced reporting that will be rolled out in 2023.
