

Switching to a New Time-Tracking & Billing Solution is Easier Than You Think

At TimeSolv, we convert a lot of companies who are unhappy with their current time-tracking and billing software. The reasons for their dissatisfaction are wide-ranging:

- The software is too slow or crashes constantly
- Critical features are missing
- Customer support is terrible (or virtually nonexistent)
- Versions have reached “end of life” and are no longer supported
- Data cannot be entered or accessed from outside the office

The list goes on and on.

Instead of switching to a new, more robust solution like TimeSolv, many companies continue to live with their dreaded time billing systems. Why? The most common reason: they assume it will be too difficult, costly, and time-consuming to switch.

In reality, this couldn't be further from the truth.

For more than 15 years, thousands of companies have been switching to TimeSolv — not only because it's a great time-tracking and billing platform, but also because we make the process of switching easy and hassle-free.
