

Tip of the Week: Enhanced Flexibility with Consolidated Invoice Subtotals

This week's tip focuses on an exciting update to our ever-evolving invoicing system: **Consolidated Invoice Subtotals on Cover Pages** with Flexible Billing Templates!

As you know, TimeSolv's Flexible Billing Templates empower you to create customized invoice layouts. You can control the information displayed, from company branding to line-item details. This already offered a significant advantage for firms handling diverse client needs.

What's New?

We've further enhanced this functionality by allowing you to showcase **subtotals for consolidated invoices** directly on the cover page! This means a clearer and more organized presentation of your project breakdowns for clients receiving combined invoices.

Benefits of Consolidated Invoice Subtotals:

- **Improved Client Clarity:** Clients instantly see a cost breakdown for each project within a consolidated invoice, enhancing transparency.
- **Streamlined Communication:** Eliminate the need for clients to navigate through the invoice to find project-specific cost information.
- **Enhanced Professionalism:** Provides a polished and well-organized invoice presentation, reflecting positively on your firm.

Empowering Your Invoicing Process

By leveraging Flexible Billing Templates with the new consolidated invoice subtotals, you can significantly enhance your invoicing efficiency and provide a more transparent and professional experience for your clients. To read more on Flexible Billing Templates, click [here](#)!
