

Tip of the Week: TimeSolv Launches New Mobile App for iOS and Android

TimeSolv has now launched new mobile apps for both Android and iOS devices.

Please note that this is not an update or upgrade, we have launched completely new apps for TimeSolv users.

One major update to highlight is the ability when creating expense entries to take pictures of the expense receipts and attach them to the entry for later syncing with the web application.

Please follow the below steps to download the new mobile app.

If you're already using the mobile app (Android or iOS), sync all time and expense entries currently stored on the mobile app. Once that is done, please delete the old mobile app.

Then head to the [Play Store](#) (for Android) or [App Store](#) (for iOS), search for **TimeSolv** and install the application. Once you have installed the app, please use your login credentials to gain access and you're all set!

If you'd like more help on how to install the new mobile app or any tools, please call us at 1.800.715.1284, email us at support@timesolv.com or [Contact support](#).
