

# Tip of the Week: Updated timer

Previously, users could only see the elapsed time on our web app by pausing the timer on the Time Entry screen and starting again. That's why TimeSolv saw it necessary to roll out the new ability to view the elapsed time when a timer is running from any place in the TimeSolv web app.

So now whenever a time entry timer is running, it appears on the header of the TimeSolv web app, and remains visible from any screen you view in the app.

Users can stop the timer by clicking on the rotating clock icon. Once stopped, the timer will disappear from the header and the time entry will be saved.

In addition to this, hovering your mouse over time will show the time entry details.

A screenshot of the TimeSolv web application interface. On the left, a 'Time Entry' section shows a calendar for December 2020. The date December 15th is highlighted in orange, with '0.00' hours recorded. Below the calendar is a 'Month Total' showing 0.00 hours and 0.00 amount. On the right, a 'Time Entry Details' modal is open, displaying the following information:  
**Time Entry Details**  
Date: 2020-12-15  
Timekeeper: Smith, Rachael  
Matter - Client: Business - MD Associates  
Task Code: B140 - Relief from Stay / Adequate Protection Proceedings  
Hours: 0.000 Rate: 300.00 Total Amount: 0.00  
Description: B140 - Relief from Stay / Adequate Protection Proceedings  
TimeCard Status: Approved  
Billable Type: Billable
