Eagan, MN July 25, 2017 – TimeSolv, a leading provider of web-based legal billing and practice management software, has released a new product, the Timeslips Converter, enabling firms using Timeslips to migrate all their historical data to TimeSolv.

This breakthrough tool solves the main issue many firms using Timeslips face: the inability to move all their data into a new system.

"We've had so many firms using Timeslips wanting to move to a cloud product such as TimeSolv without losing their historical billing data," explained TimeSolv CEO Raza Hasan. "We decided to invest in dealing with Timeslips nuances to successfully migrate historical data from the Timeslips database to TimeSolv. Trying to address this pain of prospects held hostage by Timeslips led to the creation of Timeslips Converter."

Conversion of Timeslips historical data is challenging, and there are inadequate and expensive manual options. This resulted in hesitation for most law firms who rightfully needed access to their billing history.

TimeSolv has now successfully migrated historical data for over 30 firms from Timeslips into TimeSolv.

"Our process has become very fine-tuned as we do more conversions and we're confident that this product is going to help many firms make the leap from outdated and slow client-server legacy systems such as Timeslips to more modern, cloud-based solutions such as TimeSolv," stated Hasan. "In addition to flexible billing, TimeSolv provides matter management with task budgets, document storage with document automation, client portal, conflicts check, and task management."

ABOUT TIMESOLV

TimeSolv helps lawyers and other professionals increase their billable time and get paid faster. TimeSolv is the most comprehensive, yet easy-to-use cloud time and expense billing software proven since 1999 with over $5.5 billion billed. TimeSolv can be used off line and online. Data can sync bi-directionally between TimeSolv and QuickBooks. Compatible with PCs and Macs, iPad and other tablets, iPhones and Android App.
